

# SMARTY R

**Application** Apartments, private houses, villas and other heated premises.

**Description** Smarty RV is a heat recovery unit with a high-efficiency rotary heat exchanger designed for placement in tight spaces: kitchen cabinets, boiler rooms, etc. The unit is characteristic of high overall energy savings due to the highly efficient heat recovery (up to 77%), silent and eco-nomical EC fans, and effective low-pressure-drop filters. Several versions of cooker hoods are available as an accessory for the kitchen extraction. An integrated electrical heater helps maintaining comfortable air temperature on the premises. Smarty RV is fully equipped with demand-control ready control board. CO2 or RH, and presence sensors can be connected for automatic climate control. Rotor fault indicators are included in every AHU. The supplied units have been tested and prepared for installation.

- Features**
- › Designed for placement in a space fit for a kitchen cabinet;
  - › Cooker hood connection;
  - › EC fans and rotary heat exchanger;
  - › Easy maintenance: most of the components can be removed without using tools;
  - › 2 versions: standard and more powerful “Plus”;
  - › MCB tool for multiple installations.

**Top class casing:**

- › Frameless structure consisting of double-skinned steel, with powder-coated paint (corrosion resistant class – C3), panels;
- › Thermal and acoustic insulation: Mineral wool 20 mm.

**Heat exchanger:**

- › Rotary, aluminium;
- › Rotor gap size: 1.5 mm;
- › Rotor fault indicator;
- › Efficiency up to 77% (EU 1253/2014).

**Fans:**

- › EC type;
- › Specific fan input (SFI) from 0.47 W/(m³/h);
- › Long lifetime – fans last for more than 10 years<sup>1</sup>.

**Construction** **Integrated electrical heater.**

<sup>1</sup>~40000 working hours.

**Filters:**

- › Smarty 2R VE: panel filters; ePM10 55%/ePM10 55% (M5/M5);
- › Smarty 2R Ve Plus: pocket filters ePM10 65%/ePM10 65% (M5/M5);
- › Effective filtration of dust, pollens, moulds, spores.

**Integrated control board:**

- › Control of external components : dampers etc.
- › Connection for demand control sensors (CO2 or RH, presence);
- › Smart el. heater control on/off;
- › Extensive control options: 3 manual modes, boost, calendar, night cooling, etc.

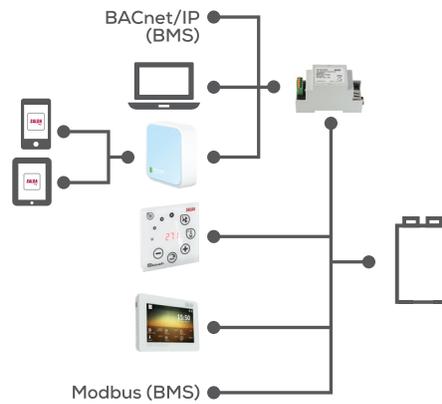

**Air temperature sensors:**

- › Extract, Supply, Outdoor.

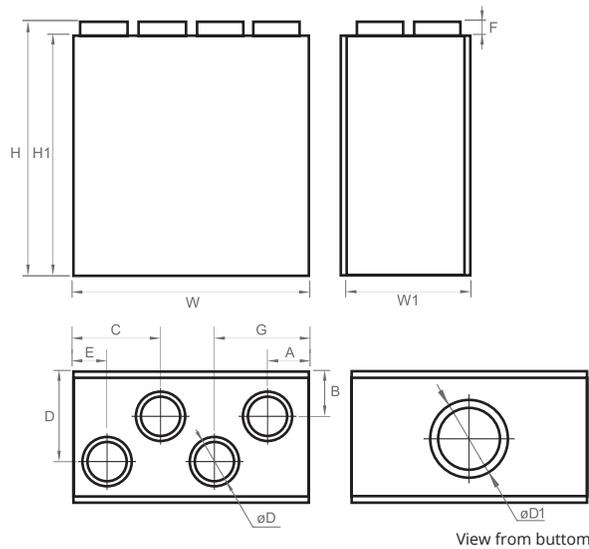

**Cooker hood connection:**

- › d125.
